Re: WT Docket No. 01-309
HAC Digital Wireless Telephones

First Semi-Annual Report

Dear Ms. Dortch:

On behalf of Centennial Communications Corp. ("Centennial"), I am submitting this first semi-annual progress report on hearing aid compatibility with Centennial's digital wireless systems. Centennial holds cellular licenses in 26 markets in six states, as well as the B Block broadband PCS license in MTA 25 – Puerto Rico/US Virgin Islands. In Centennial's domestic markets, it utilizes Motorola, Nokia, Sony Ericsson and Panasonic equipment, in the Caribbean market, Centennial uses Audiovox equipment. As a result, Centennial depends on the implementation of hearing aid compatibility solutions by these manufacturers. Once the hearing aid compatibility solutions of these equipment manufacturers are commercially available, Centennial will implement them in its markets.

Centennial understands that these equipment manufacturers will be filing hearing aid capability status reports through the Alliance for Telecommunications Industry Solutions ("ATIS"), and it directs the Commission to those reports for specific information regarding development and deployment activities. Centennial will make every effort to implement hearing aid compatible equipment in its markets as soon as possible.

Please contact me if you require any additional information.

Very truly yours,

WILLIAM L. ROUGHTON
Vice President
